Versatile Full Stack Developer with hands-on experience
building and deploying real-world applications using Python and the MERN stack. Proven ability to integrate AI functionalities and work on both client and academic projects, delivering scalable and maintainable software solutions.

TECHNICAL SKILLS

Languages & Frameworks : JavaScript, React.js, Express.js, Typescript , Angular ,Next.Js

Databases : MongoDB, MySQL, PostgreSQL

Dev Tools & Platforms : Git, GitHub, Docker, AWS EC2,Vercel

Authentication & Payments : Auth0, JWT, Razorpay,

Frontend Tools : Redux Toolkit , Zustand , Bootstrap, Tailwind CSS, HTML, CSS, Material UI,
ReactBits , Shadcn

Methodologies : Agile, RESTful API Design, CI/CD

PROFESSIONAL EXPERIENCE

SYNNEFO SOLUTIONS **APRIL 2023 – Present**

MERNSTACK DEVELOPER

- Developed and deployed real-world web applications using MERN stack for both client and academic projects, delivering scalable and maintainable solutions.
- Built and integrated RESTful APIs, Razorpay payments, JWT, and Auth0 authentication for secure, scalable platforms across different domains.
- Designed dynamic and responsive frontends using React.js, Tailwind CSS, and Redux Toolkit for multi-role applications such as tenant and instructor portals.
- Collaborated closely with cross-functional teams in an Agile environment, contributing to planning, development, and deployment phases while ensuring code quality and timely delivery.
- Develop RESTful and GraphQL APIs to facilitate seamless communication between the frontend and backend
- Design, implement, and optimize MongoDB schemas for data storage and retrieval, ensuring application performance and security.
- Work closely with cross-functional teams, including designers, product managers, and other developers, to deliver high-quality solutions.
- Deploy applications on cloud platforms (e.g., AWS) and ensure performance optimization, debugging, and issue resolution.
- Trained interns and supported onboarding of new team members, promoting knowledge sharing and productive teamwork through collaborative sessions and mentorship.

SFO TECHNOLOGIES **APRIL 2021 - FEB 2023**

FRONTEND DEVELOPER

- Design, develop, and maintain scalable web applications using JavaScript for frontend development and Django for backend development.
- Create RESTful APIs with Django and integrate them seamlessly with frontend applications, ensuring optimal performance and security.
- Work closely with designers, product managers, and other developers to deliver user-centric features and functionalities.
- Write clean, efficient, and reusable code while identifying and resolving application issues and bottlenecks.
- Keep up-to-date with the latest trends and technologies in JavaScript frameworks (e.g., React) and Django to implement modern development practices.

PROJECTS

Learning Management System (LMS) - Tech Stack: MERN, AuthO, Razorpay, Redux Toolkit, Tailwind CSS

- Built a multi-role platform for tenants and instructors with secure Auth0 login
- Enabled course creation, enrollment, and online payments via Razorpay
- Designed a responsive frontend with dynamic dashboards using React and Tailwind

Customer Relationship Management (CRM) - Tech Stack: MERN, Redux Toolkit, JWT, Chart.js,Tailwind CSS

- Developed a lead tracking system with automated status updates and analytics
- Integrated JWT authentication and real-time role-based access
- Visualized performance metrics using Chart.js within a clean UI

EDUCATION

Diploma in Computer Engineering-MADIN POLY TECHNIC COLLEGE Malappuram
06/2014-03/2017

Vocational Higher Secondary Education **(Computer** Science) SHMGVHSS Edavanna Malappuram
06/2012-03/2014
