JINU KRISHNAN P

SENIOR FRONTEND DEVELOPER & TEAM LEAD | MERN / MEAN STACK

Malappuram, Kerala, India | +91 9567473317 | Jinukrishnan.p@gmail.com | linkedin.com/in/jinu-krishnan-1452b0134 | github.com/Jinukrishnan

PROFESSIONAL SUMMARY

Results-driven Senior Frontend Developer & Team Lead with 6+ years of hands-on industry experience — equivalent to a Computer Science degree — across the MERN and MEAN stacks. Currently spearheading the ground-up rebuild of ZilMoney Version 2, a US-based fintech platform serving US businesses with products spanning credit card, virtual card, international payments, and business tools. Expert in Angular (with RxJS), React.js, and TypeScript, with a strong track record in API integration, code review, team leadership, and mentoring. Actively leverages AI-assisted development tools (Claude, ChatGPT, Cursor, Manus, PromptGenie) to accelerate delivery. Proven ability to deliver scalable, secure, and maintainable software in fintech, SaaS, and enterprise domains.

TECHNICAL SKILLS

- Languages & Frameworks: JavaScript (ES6+), TypeScript, Angular, React.js, Next.js, Express.js, Node.js
- Angular Ecosystem: RxJS, NgRx, Angular Forms, Angular Router, Angular Material, Lazy Loading
- React Ecosystem: Redux Toolkit, Zustand, React Hooks, Context API
- Databases: MongoDB, MySQL, PostgreSQL
- Dev Tools & Platforms: Git, GitHub, Docker, AWS EC2, Vercel, CI/CD Pipelines
- Authentication & Payments: Auth0, JWT, Razorpay
- Frontend & UI: Tailwind CSS, Bootstrap, Material UI, Shadcn, ReactBits, HTML5, CSS3, SCSS
- Testing: Jasmine, Karma (Angular unit testing)
- AI-Assisted Development: Claude, ChatGPT, Cursor, Manus, PromptGenie
- Methodologies: Agile / Scrum, RESTful API Design, GraphQL, Code Review, Team Leadership

PROFESSIONAL EXPERIENCE

ZilMoney — Senior Frontend Developer cum Team Lead

December 2025 – Present

ZilMoney | US-based fintech company | All-in-one business payments and banking platform

- Handpicked by leadership to lead the complete frontend rebuild of ZilMoney Version 2, a large-scale US fintech application, expanding the product suite to include credit card, virtual card, international payments, and business tools.
- Own frontend architecture and implementation in Angular, using RxJS, NgRx, and TypeScript to build high-performance, scalable modules for a live US-facing financial product.
- Led all frontend integration efforts — connecting Angular modules to backend microservices and third-party financial APIs — ensuring secure, seamless data flow across payment and banking features.
- Conduct structured code reviews for a team of frontend engineers, enforcing coding standards, Angular best practices, and financial-grade security requirements, resulting in significantly fewer production issues.
- Serve as Team Lead: planning sprints, assigning tasks, unblocking teammates, reviewing PRs, and mentoring junior developers to maintain velocity and code quality.
- Collaborate daily with backend engineers, QA, product managers, and UI/UX designers in an Agile/Scrum environment to ship features on schedule.
- Integrate AI-assisted development tools (Claude, ChatGPT, Cursor, Manus, PromptGenie) into daily workflow, accelerating feature development, debugging, and documentation.

Synnefo Solutions — MERN Stack Developer

April 2023 – December 2025

Synnefo Solutions | Full-service software development company | Client & academic projects

- Built and deployed 10+ web applications using the MERN stack for clients across e-learning, SaaS, and CRM domains, delivering scalable, production-ready solutions.
- Integrated RESTful and GraphQL APIs, Razorpay payment gateway, JWT authentication, and Auth0 for secure, multi-role platforms used by hundreds of end users.
- Architected and developed dynamic, responsive frontends in React.js with Redux Toolkit and Tailwind CSS for multi-role portals (tenant, instructor, admin).

- Designed and optimized MongoDB schemas for high-read applications, improving query performance and data integrity.
- Deployed applications on AWS EC2 and Vercel, handling CI/CD pipelines, performance tuning, and production debugging.
- Mentored and onboarded 3+ junior developers and interns, running code review sessions and knowledge-sharing workshops to raise overall team output.
- Collaborated in Agile sprints with cross-functional teams across planning, development, QA, and deployment phases.

SFO Technologies — Frontend Developer

April 2021 – February 2023

SFO Technologies | Technology services company

- Designed and developed scalable web applications using JavaScript and React.js for the frontend, and Django for backend APIs.
- Built and consumed RESTful APIs, ensuring seamless integration between frontend and backend layers with a focus on performance and security.
- Collaborated with UI/UX designers and product managers to deliver user-centric, responsive interfaces for client projects.
- Wrote clean, reusable, and maintainable code; identified and resolved frontend bottlenecks and cross-browser compatibility issues.
- Maintained awareness of evolving JavaScript ecosystem trends (React, ES6+) and applied modern development practices.

PROJECTS

ZilMoney Version 2 — US Fintech Platform (Live)

Tech Stack: Angular, RxJS, NgRx, TypeScript, RESTful APIs, Third-Party Financial Integrations, Agile

- Led frontend development of ZilMoney V2 from the ground up — a complete rebuild of a US-based fintech platform serving American businesses.
- Delivered multi-product modules: credit card management, virtual card issuance, international payment processing, and business financial tools.
- Drove all frontend-to-backend integration work, connecting Angular components with financial services APIs for secure, real-time data exchange.
- Established frontend code review standards and practices, ensuring financial-grade code quality and regulatory compliance across the team.

Learning Management System (LMS)

Tech Stack: MERN, Auth0, Razorpay, Redux Toolkit, Tailwind CSS

- Built a multi-role platform for tenants and instructors with secure Auth0 authentication and role-based access control.
- Integrated Razorpay for online course payments, supporting end-to-end enrollment and payment workflows.
- Designed responsive dashboards in React and Tailwind CSS for both instructor and student portals.

Customer Relationship Management (CRM)

Tech Stack: MERN, Redux Toolkit, JWT, Chart.js, Tailwind CSS

- Developed a full-featured lead tracking system with automated status updates, pipeline views, and team analytics.
- Implemented JWT-based authentication with real-time role-based access control for sales team workflows.
- Visualized KPIs and sales performance metrics using Chart.js, giving sales managers actionable insights in a clean dashboard UI.

EDUCATION

Diploma in Computer Engineering

06/2014 – 03/2017

Madin Polytechnic College, Malappuram | Equivalent to 6+ years of hands-on software development experience

Vocational Higher Secondary Education (Computer Science)

06/2012 – 03/2014

SHMGVHSS Edavanna, Malappuram
